PROFESSIONAL SUMMARY

Frontend Developer with 1.5+ years of professional experience building enterprise-grade Angular applications. Delivered complete frontend for ChillMaster — a cloud-based chiller selection platform with role-based workflows. Strong foundation in TypeScript, RxJS, and backend integration with Node.js and PostgreSQL. Actively growing towards full-stack development.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, RxJS, Reactive Forms, State Management, HTML5, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, JWT Authentication

Tools & Practices: Git, GitHub, Jira, Agile/Scrum, AWS S3

EXPERIENCE

ChillMaster — Blue Star

chillmaster.bluestarindia.com

Angular, TypeScript, Firebase (SSO), TailwindCSS, AWS S3, Bitbucket, Jira

- Built the entire frontend for ChillMaster — a cloud-based chiller selection & performance analysis platform used by engineers, sales & R&D teams at Bluestar India.
- Implemented modular component-based architecture with lazy-loaded routes, route guards, and role-based access control (SuperAdmin, Engineer, R&D, Sales).
- Created reusable editable grid/table components for inline editing and dynamic row/column management, reducing duplicate code.
- Handled Excel bulk import/validation, AWS S3 file uploads, and client-side validation/error reporting.
- Collaborated with backend (Node.js, PostgreSQL), QA, and product owners via Jira; participated in sprint planning and code reviews.

Green Platform

greenin.com

Frontend Enhancements — Responsive UI, Performance Optimization

- Converted a desktop-only platform into a fully responsive application, improving usability across mobile devices.
- Resolved UI and functional bugs, enhancing overall stability and user experience.
- Improved UI responsiveness by optimizing component rendering and reducing unnecessary updates.
- Worked with amCharts to implement and refine interactive data visualizations.

PERSONAL PROJECTS

Amin Estate

estate-mern-0kti.onrender.com

React, Redux, TailwindCSS, Express.js, MongoDB, Node.js

- Built a real estate platform using the MERN stack emphasizing modern architecture and best practices.
- Implemented advanced authentication including JWT and Google OAuth for secure user access.
- Developed real-world CRUD operations for property listings, enhancing backend experience.
- Enhanced UX with image uploads and advanced search functionality, fully hosted.

Qid Clone

qid-clone.vercel.app

TailwindCSS, JavaScript, React, React-Router

- Successfully cloned a complex website in 3 days utilizing React, Tailwind CSS, and React Router for navigation.
- Ensured responsive layout across all devices down to 320px, prioritizing user experience for mobile users.
- Replicated website's core message and functionalities, demonstrating understanding of user needs.

EDUCATION

Rashtrasant Tukadoji Maharaj Nagpur University

2023

Bachelor of Computer Applications (BCA)

CGPA: 7.8
